**RATIONAL**

**FRAMED**  
"The uniqueness of human existence"

THE UNIQUENESS OF HUMAN EXISTENCE

LIGHTSCULPTURES  
MURANO

**Framed** is a light sculpture which symbolizes the inner light and luminous wisdom that can guide each of us through the darkness of ignorance and confusion.

Art references: **Existentialism**

**Existentialism** is a philosophy that emphasizes individual existence, freedom and choice. It is the view that humans define their own meaning in life, and try to make rational decisions despite existing in an irrational universe.

Instead of being overly dependent on anyone else, we must be the leaders and seers. We must take the lead and see for ourselves. Feel the irrelevance (or even negative influence) of rational thought, moral values, or empirical evidence, when it comes to making fundamental decisions concerning one's existence.

**Symbolism of the sculpture:**

**The main big Bronze Frame:** The human environment symbolize the contemporary *struggle*, ignorance and confusion, (small crystal parts begin to stand out)

**The Frames detaching from the main one:**

These elements move away from the main and gradually turn into **raw crystal**. They represents the individual choice, the sense of true inner freedom, independent of both outer circumstances and internal emotions. The sense of being completely comfortable at peace, and at ease in every situation and every circumstance.
